

'Creating brighter futures'

18th September 2017

Dear Parent/Guardian,

Re: Staff Member with Low Immunity

One of our staff members has a severely lowered immunity and is at risk of complications if exposed to certain infections such as chicken pox, shingles etc.

Could I please ask that you inform school if your child has or is about to receive any pre-school vaccinations or flu vaccines, especially the nasal flu vaccine, most typically given to children and babies.

This will not affect your child's attendance at school but means that we can take the necessary precautions to protect our staff member and we would ask you to contact us of any cases as soon as possible.

Thank you for your cooperation with this matter.

Yours faithfully,

Chris White
Headteacher
